

COMMUNICATION HUB

CORDINOS reduces cognitive load and increases efficiency in high-stress settings.

HIGHLIGHTS

Automate the manual documentation of internal and external communications made on behalf of a patient to improve workflow efficiency.

Standardized communication

Real-time access to data

Improved efficiency & patient through-put

Communication failures have big impacts.

30% of malpractice lawsuits are the result of communication failures.

CORDINOS facilitates the flow of information in healthcare settings, improving **communication** and **patient satisfaction**.

Emergency Department wait times are at an all-time high.

The average Emergency Department visit can range from **5 hours** to **14 hours**.

CORDINOS provides a real-time dashboard with **visual indicators** to signal when outstanding communication is causing unnecessary delays for a patient.

Poor communication between healthcare workers can lead to delays in care.

The **cost per minute** for an Emergency Department visit is in the range of **\$20** to **\$50**.

CORDINOS was developed by Emergency Medicine clinicians, and pressure tested in the Emergency Department setting, where communication is critical given the fast-paced and high-stakes environment where decisions need to be made **quickly** and **accurately** and **every minute counts**.
